WAR THUNDER · MATCH ANALYSIS

What 300 War Thunder matches show

Five chart types, one dataset

Matches played by Apolox_Dragon in War Thunder

Analysed with WT Session Readout, in the browser

Counting unit: matches

The data

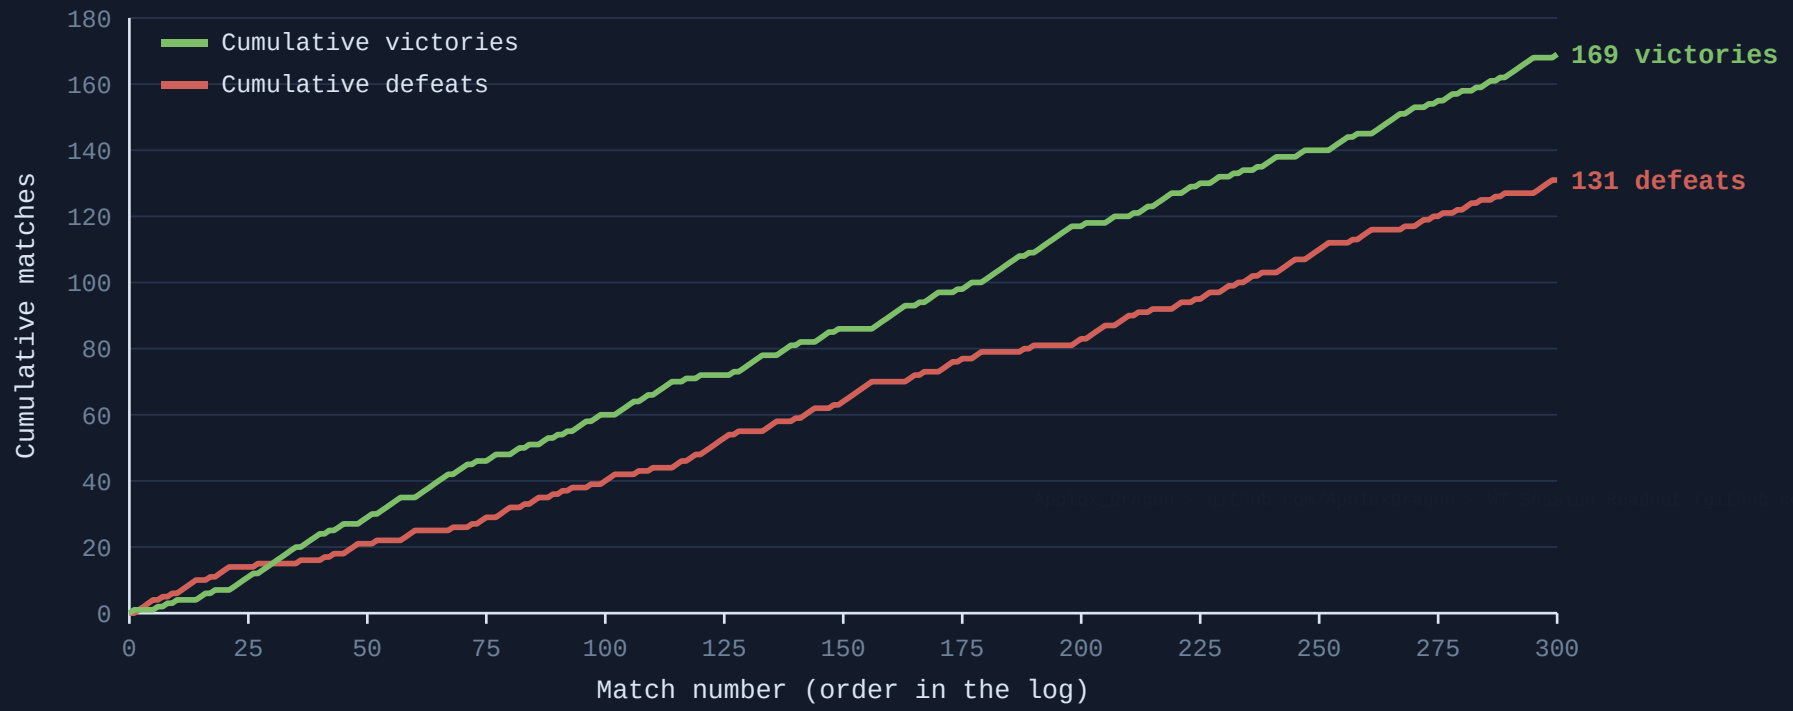

300 UNIQUE MATCHES	**334** PASTED REPORTS	**34** REPEATS REMOVED
238 RANDOM BATTLES	**62** TANK ASSAULT	**169 (56.3%)** MATCHES WON

- Everything is counted in matches, not points, time or Silver Lions.
- Charts 1, 3 and 5 use all 300 matches; charts 2 and 4 use Random Battles only (238).
- Repeated reports are removed by Session ID; the tool runs entirely in the browser, nothing is uploaded.

CHART 1 Cumulative victories and defeats

All 300 matches (Random Battles + Tank Assault)

Won 169 of 300 matches (56.3%); lost 131.

Biggest lead: +41 wins over losses, at match 295; the log ends at +38.

Longest streaks: 8 wins in a row, 7 losses in a row.

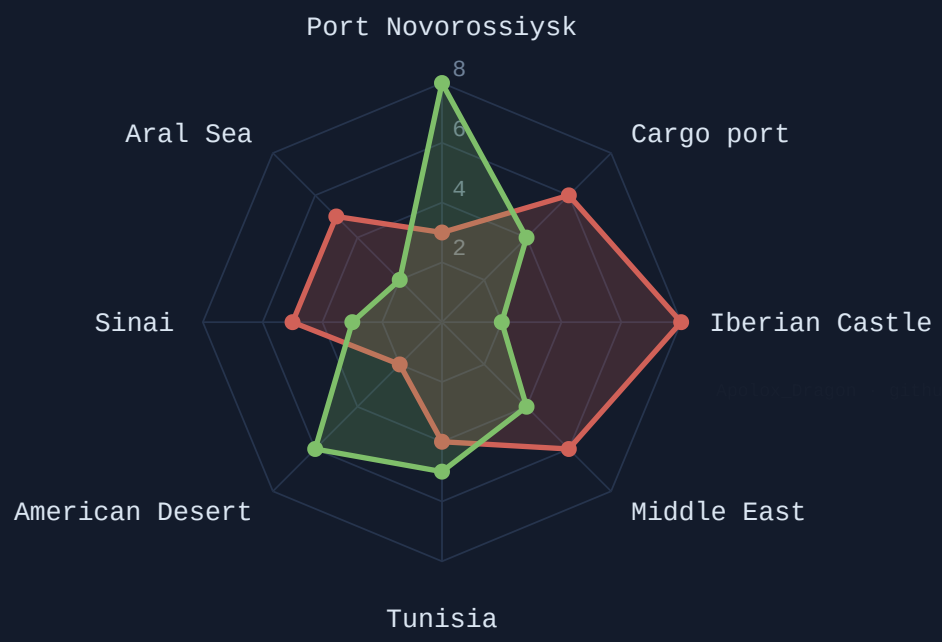

The horizontal axis is the position in the log, not a date: the log has no dates.

CHART 2

Victories and defeats on the 8 most played maps

Random Battles only · 238 matches

Victories

Defeats

Each axis is a map. Radial scale: number of matches (rings every 2).

The 8 most played maps hold 73 of 238 Random Battles matches (30.7%).

Most wins: Port Novorossiysk (8). Best win rate: American Desert, 6 of 8 (75.0%).

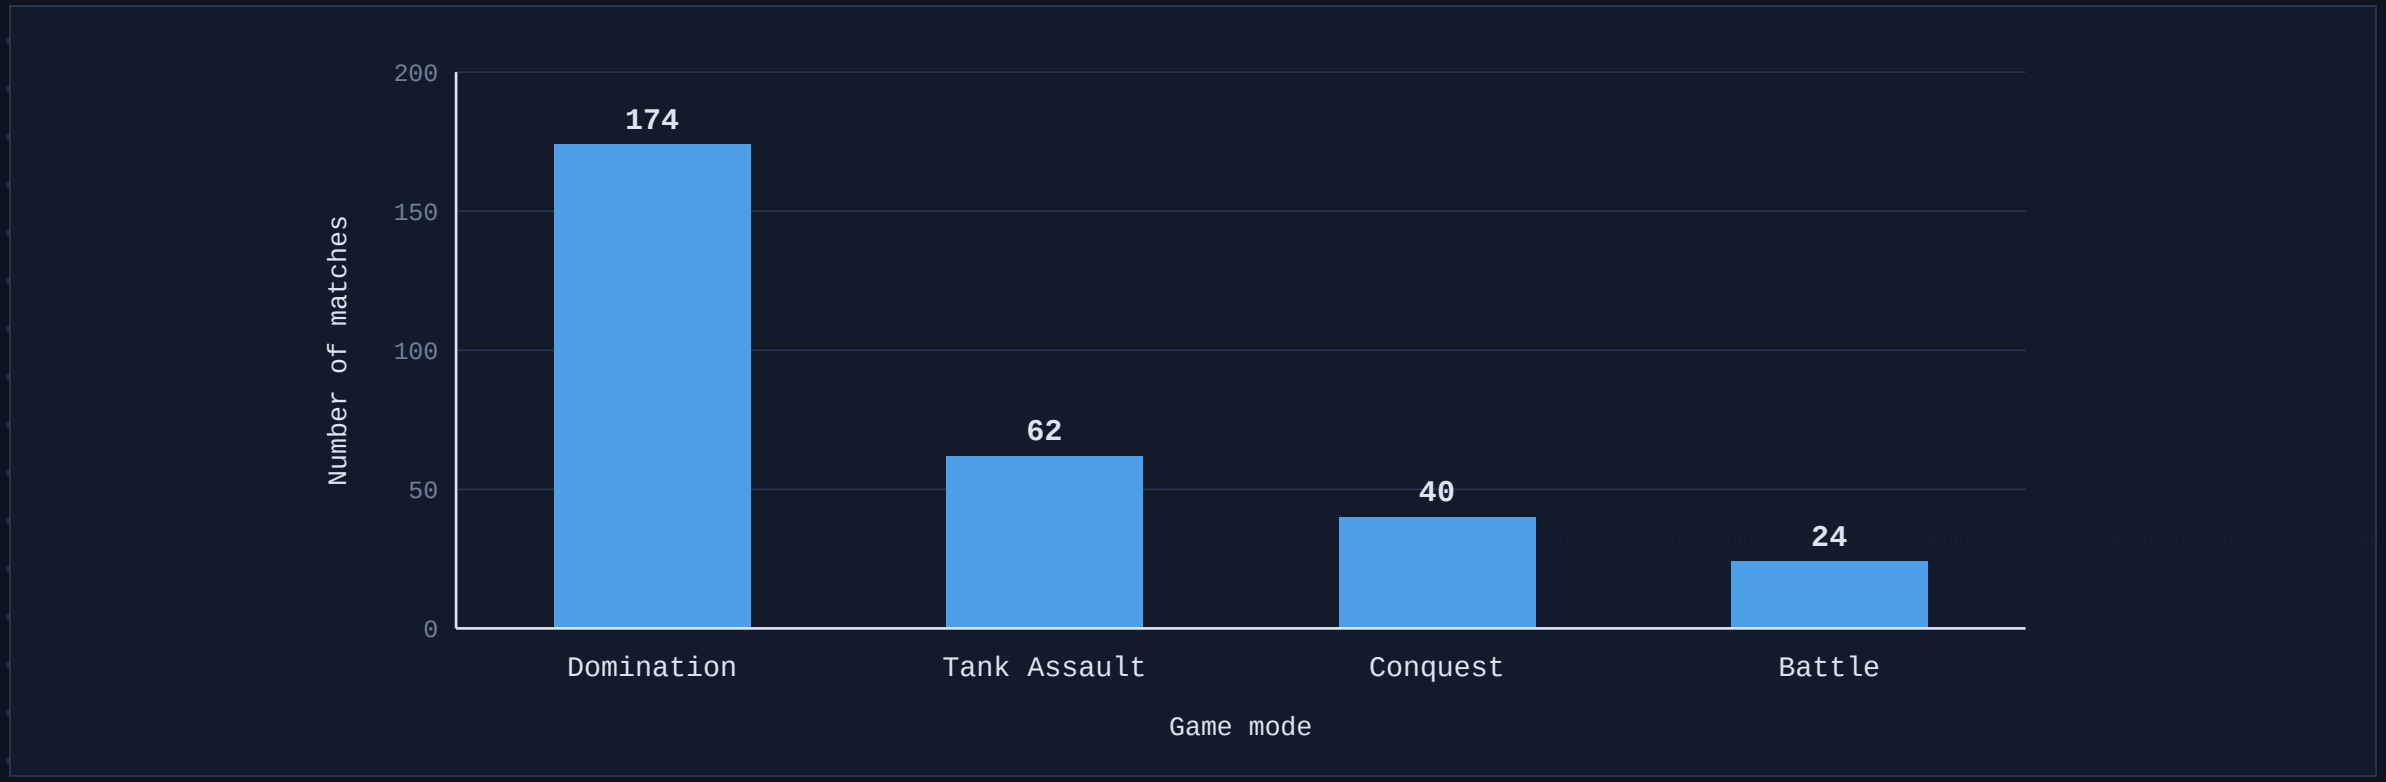

Lowest win rate: Iberian Castle, 2 of 10 (20.0%).

Each map has only 7–11 matches, so one result moves the percentage a lot.

Source: matches played in War Thunder.

CHART 3 Matches per game mode

All 300 matches (Random Battles + Tank Assault)

Domination is the most frequent mode: 174 matches (58.0%).

All modes: Domination 174 · Tank Assault 62 · Conquest 40 · Battle 24.

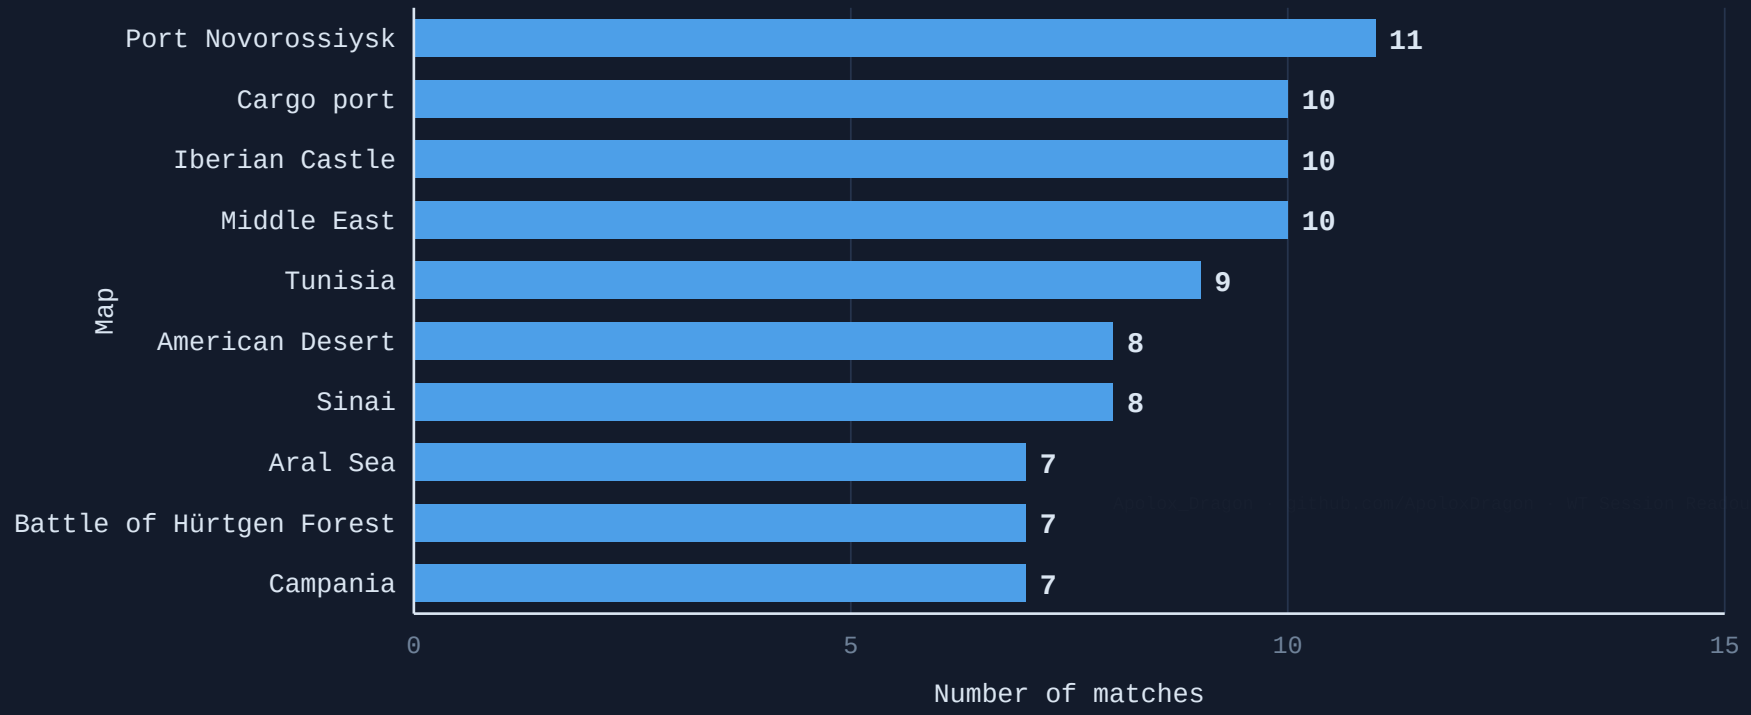

Together they add up to the 300 matches.

Tank Assault is both a mode in the log and a category in the tool.

CHART 4

The 10 most played maps

Random Battles only · 238 matches

Most played map: Port Novorossiysk, 11 matches (4.6%).

The top 10 maps hold 87 of 238 matches (36.6%).

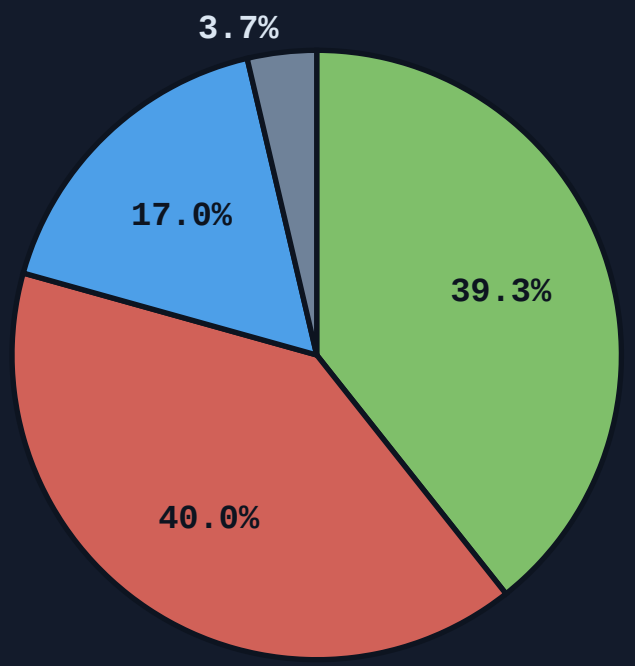

56 different maps appear in Random Battles.

Horizontal bars fit long map names and read as a ranking.

CHART 5

Matches by battle type and result

All 300 matches (Random Battles + Tank Assault)

Battle type · result

- Random Battles · victory
  118 matches (39.3%)
- Random Battles · defeat
  120 matches (40.0%)
- Tank Assault · victory
  51 matches (17.0%)
- Tank Assault · defeat
  11 matches (3.7%)

Total: 300 matches = 100%

Random Battles: 238 matches, 118 won (49.6%).

Tank Assault: 62 matches, 51 won (82.3%).

Overall: 169 of 300 won (56.3%).

This is a difference in this sample; the chart does not say why.

How to read this

- One player, accumulated over time: a convenience sample, not random and not representative of all players.
- "Random Battles" is the tool's category for every match that is not Tank Assault; the log does not say whether a match was ground or air.
- Map percentages rest on a few matches each; treat them as a pattern, not a verdict.
- The log has no dates, only the order the matches were pasted in.
- Differences shown are in this sample; the charts do not show causes.

Summary

- 300 unique matches: 56.3% won overall.
- Random Battles: 49.6% won; Tank Assault: 82.3% won (a smaller sample, 62 matches).
- Five chart types, five different questions: trend, profile, comparison, ranking, share.
